Python Basics

👤 PROFILE

I am a Restaurant Manager from St Ives, Cornwall, with over 15 years of experience in hospitality. I am employed full-time in the top rated and award-winning Porthminster Beach Cafe, St Ives, where I have worked for 7 seasons. I have recently taken a step back from senior management, and currently hold the position of Bar Manager. I have previously occupied the role of Floor Manager, Restaurant Manager and Maître' D.

I am a graduate of the University of South Wales and was awarded a 2:1 in Sound Technology (BSc). The degree focused on Audio Engineering, Acoustic Engineering, Audio Focused Web Development (Flash), Product Development and Electrical Engineering.

After graduating I decided to travel and pursue a career in hospitality. Due to changes in my personal life, I have now decided to re-enter the field of tech and pursue a career in Software Development.

Problem solving, critical thinking, communication and creativity were essential skills required for my degree. Along with the organisational skills, time management, adaptability and attention to detail that I have developed in my hospitality career, I believe I hold a broad set of skills that make a brilliant fit for a position as a Junior Full Stack Developer in training.
